SUMMARY

Full-Stack Software Developer with a strong analytical foundation in Geophysics, certified from Purwadhika Digital Technology School. Experienced in building and deploying production-ready web applications end-to-end: React, Next.js, Vue/Nuxt, and TypeScript on the frontend; Node.js/Express with Prisma and Go (chi, Gin, GORM) on the backend; PostgreSQL for data. Projects include an AI-powered English-learning platform with OpenAI integration, a multi-tenant photobooth platform, and a laundry service app with payment and geolocation integrations. Skilled in authentication (JWT, Google OAuth), role-based access, automated testing, and CI/CD with GitHub Actions, Docker, and VPS deployment. Combined with 3 years of international work experience in Australia and a background in scientific research, bringing strong problem-solving, adaptability, and cross-cultural collaboration.

PROJECTS

BEC Assistant - AI-Powered English Language Assistant Application

(Tech Stack: React 19, TypeScript, Vite, Tailwind CSS, TanStack Query, Zustand, Recharts, Go (chi), PostgreSQL, OpenAI API, Google OAuth, Docker, Caddy, GitHub Actions)

- Built a full-stack AI English-learning platform (React/TypeScript, Go, PostgreSQL, OpenAI) that analyzes writing, handwriting photos, and speech to give CEFR scoring and grammar and pronunciation feedback. It has student, teacher, and admin dashboards with progress tracking and class management.
- Implemented Google OAuth, JWT with refresh-token rotation, rate limiting and daily quotas, and an AI eval suite. Covered with 100+ tests (Go, Vitest, Playwright) and deployed via GitHub Actions CI/CD to a VPS with Docker and Caddy.

Nora Photobooth - Software And Web Photobooth Application

(Tech Stack: Vue 3, Nuxt 4, Tailwind CSS, i18n, Go (Gin Framework), GORM, PostgreSQL, Cloudinary,Ubuntu VPS, Google Sheet Api, Github Actions)

- Built Nora Photobooth, a full-stack multi-tenant platform for a digital and on-site photobooth business, using Vue 3/Nuxt 4 on the frontend and Go (Gin, GORM, PostgreSQL) on the backend with role-based authentication and Cloudinary/Google Sheets API integrations.
- Designed a multi-tenant architecture giving each customer their own scoped dashboard, frames, and public sub-URL, and deployed the system end-to-end (VPS with CI/CD via GitHub Actions, Vercel for the frontend).

Fresh Press - Laundry Services Web Application

(Tech Stack: Next.js, TypeScript, Tailwind CSS, Express.js, Node.js, PostgreSQL, Prisma ORM, Midtrans, OpenCage)

- Developed a dynamic full-stack web application for on-demand laundry services, connecting customers, outlet operations, and delivery services through a comprehensive role-based .
- Integrated Midtrans payment gateway and OpenCage geolocation API to automate payment verification, optimize logistics, and streamline outlet management and production tracking.

EXPERIENCE

Professional Development **Oct 2022 – Oct 2025**

Working Holiday Visa (WHV) Program — New South Wales, Australia

- Toll Global Forward & Tyrolit Australia: Operated as a Forklift Driver and Assistant Warehouse Worker, ensuring high standards of workplace safety, precise time management, and fluid team coordination in high-pressure environments.
- Woolworths Warehouse: Worked as a Voice Picker, utilizing enterprise warehouse management systems and sharpening focus, speed, and sharp attention to detail.

Assistant Lecturer **Sep 2021 – Mar 2022**

Institut Teknologi Sepuluh Nopember (ITS) — Surabaya, Indonesia

- Mentored and supervised 50+ students during hands-on geophysical fieldwork and data acquisition programs at the Lusi (Lumpur Sidoarjo) embankment while leading field operations and quality control for Electrical, Electromagnetic, Seismic, GPR, Gravity, and Magnetic surveys.
- Evaluated, processed, and validated complex geophysical datasets to ensure accurate subsurface modeling and reliable geological structural interpretation.

Scientific Researcher **Nov 2020 – Dec 2020**

Institut Teknologi Sepuluh Nopember (ITS) — Gresik, Indonesia

- Conducted advanced geophysical research to identify subsurface faults across Lamongan, Gresik, and Surabaya using Magnetotelluric (MT) instrumentation, including precise field data acquisition, equipment calibration, and signal quality control across 15 measurement points.
- Utilized Python to process, filter, and model magnetotelluric datasets, enabling accurate subsurface structural interpretation.

EDUCATION

Purwadhika Digital Technology School **Jan 2026 – Jul 2026**

Full-Stack Software Development

Institut Teknologi Sepuluh Nopember (ITS) **Aug 2017 – Sep 2021**

Bachelor of Geophysical Engineering

GPA 3.3/4

CERTIFICATION

IDP IELTS Australia **Oct 2024 – Oct 2026**

ACADEMIC IELTS

Score 6/9

SKILLS

Hard Skills: JavaScript, TypeScript, Go, Python, React.js, Next.js, Vue.js, Nuxt.js, Node.js, Express.js, Go (chi, Gin), Prisma ORM, GORM, PostgreSQL, Tailwind CSS, HTML5, CSS3, RESTful API Design, TanStack Query, Zustand, Vite, JWT & OAuth 2.0 (Google), OpenAI API, Docker, GitHub Actions (CI/CD), Caddy, Git, Vitest, Playwright, Go Testing.

Soft Skills: Teamwork & Collaboration, Problem Solving, Analytical Thinking Adaptability, Cross-cultural Communication, Leadership, Attention to Detail, Time Management, Stakeholder Management.
