## Nora Photobooth — Event Services & Admin Management Platform

Nuxt 4 · Vue 3 · Pinia · Tailwind CSS · Go · Gin · GORM · PostgreSQL · JWT · Cloudinary · Google Sheets API

### SITUATION

A photobooth rental business needed a marketing website to showcase packages and past events, plus a back-office system for staff to manage content and track finances without touching the database directly.

### TASK

Build a public-facing site to present rental packages, galleries, and testimonials, alongside a secured admin dashboard for full content and financial management, backed by a robust and independently deployable API.

### ACTION

Developed the frontend with Nuxt 4, Vue 3, and Pinia for state management, styled with Tailwind CSS. Built a layered REST API in Go using the Gin framework, with GORM and PostgreSQL for structured data. Implemented JWT-based authentication with role-based access control, integrated Cloudinary for media uploads, and connected the finance module to the Google Sheets API.

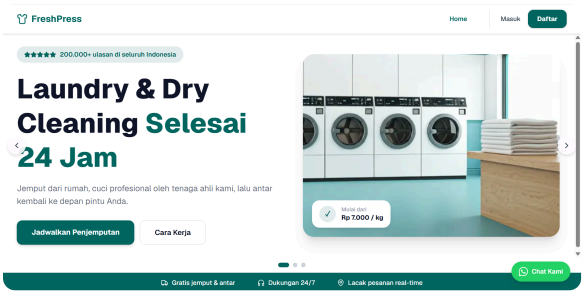

### RESULT

Delivered a fully functional platform with a public marketing site driving inquiries via WhatsApp, and a role-protected admin dashboard for managing packages, gallery, reviews, and finances — all served by an independently deployed Go API.

# FreshPress — Laundry Services App

Next.js | TypeScript | Tailwind CSS | Express.js | Node.js | PostgreSQL | Prisma ORM | Midtrans | OpenCage

## SITUATION

On-demand laundry services needed a dynamic platform to bridge customers, outlet operations, and delivery services into one streamlined workflow.

## TASK

Develop a full-stack web application covering user and order management, role-based dashboards for staff, and reliable order/point tracking logic.

## ACTION

Implemented secure authentication and a seamless ordering flow with Next.js and TypeScript. Built multi-role access control for Admin, Super Admin, and Drivers. Engineered relational database schemas with PostgreSQL and Prisma ORM, and integrated Midtrans for payments plus OpenCage and Geolocation for delivery tracking.

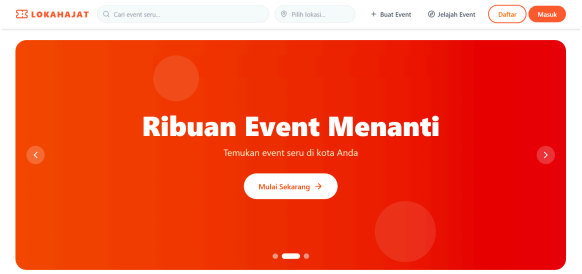

## RESULT

Delivered a fully functional, deployed laundry service platform with real-time order tracking, role-based operations, and integrated payment and location services.

# LokaHajat — Event Management Platform

React.js | TypeScript | Tailwind CSS | Express.js | Node.js | PostgreSQL | Prisma ORM

## SITUATION

Event organizers and attendees needed a reliable platform to discover events, book tickets securely, and manage ticket sales without relying on scattered manual processes.

## TASK

Develop a comprehensive, full-stack event ticketing platform covering event discovery and booking, a referral and loyalty point system, and an organizer dashboard.

## ACTION

Built a dynamic frontend with React.js, TypeScript, and Tailwind CSS for browsing events and completing a secure checkout flow. Engineered custom business logic for referral mechanics. Developed a CMS-style organizer dashboard with Express.js, Node.js, PostgreSQL, and Prisma ORM.

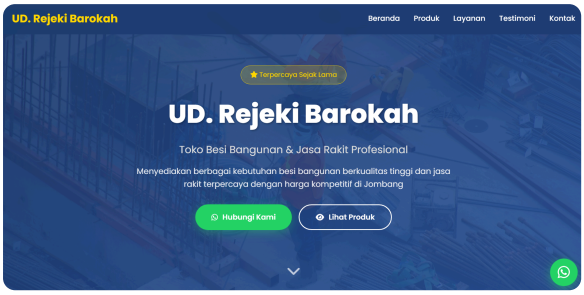

## RESULT

Delivered a fully functional, deployed event ticketing platform with automated referral rewards and real-time organizer analytics.

# UD. Rejeki Barokah — Business Website

React.js Tailwind CSS

## SITUATION

UD. Rejeki Barokah, a building materials and metal fabrication shop in Jombang, Indonesia, had no online presence to showcase its products and reach customers beyond word of mouth.

## TASK

Build a responsive business website to present the shop's steel products and fabrication services, and make it easy for customers to get in touch.

## ACTION

Built a fully responsive UI with React.js and Tailwind CSS, featuring a product and services showcase, customer testimonials, and clear contact information with direct WhatsApp and phone call-to-action buttons.

## RESULT

Delivered a live business website that gives the shop a professional online presence and a simple way for customers to browse offerings and reach out directly.
